

# MANGIA MACCHIA

**La Pasta Mangiamacchia** è un prodotto appositamente formulato per l'eliminazione di macchie su materiali lapidei quali marmi, graniti, pietre calcaree, ardesia, cotto e ceramica. Elimina la maggior parte di macchie evidenti di olio, grasso industriale, grassi alimentari, caffè, ecc... Va tenuto presente, però, che essendo presenti numerose casistiche, non è possibile fornire una garanzia di risultato. Non intacca il lucido del materiale, non lascia aloni e consente di ripristinare l'originale bellezza del materiale. La sua composizione chimica permette di assorbire in profondità macchie particolarmente resistenti.

**MODO D'USO:** Applicare uno strato di MANGIAMACCHIA dello spessore di circa 5 mm. E' consigliato applicare il prodotto con una spatola o con una paletta. Una volta distribuito il prodotto omogeneamente sulla macchia da eliminare, coprire con un film plastico (es. polietilene) affinché si crei umidità. Creandosi umidità, si permette alla pasta di rimanere morbida e rende più efficace l'assorbimento della macchia. Dopo 2 - 3 ore, rimuovere il film plastico e lasciare asciugare il preparato. Una volta asciutto (dopo circa 8 -10 ore, a seconda della temperatura ambiente), la pasta si polverizzerà assumendo un aspetto biancastro. Procedere all'asportazione della polvere con una spazzola.

**AVVERTENZE E CONSIGLI D'USO:** Prima di applicare il prodotto mischiare bene la pasta nel barattolo per amalgamare i componenti. La pasta deve aderire bene al supporto per migliorarne l'efficacia. Nella rimozione di macchie d'olio, accertarsi che la pasta sia ben applicata in quanto tende a "scivolare" via. Nel caso che, dopo la prima applicazione, la macchia non sia completamente scomparsa, procedere ad applicazioni successive. Una volta rimossa la polvere, si consiglia lavare con DETERGENTE LEM-3 (nel caso di marmo e pietre calcaree), con DETERGENTE EXTRA FORTE BERT/27 nel caso di granito o cotto. Onde evitare di macchiare nuovamente il materiale consigliamo la protezione con IDRO-OLEO REPELLENTE BLOCK D70.

**RESA:** La resa del prodotto dipende dall'intensità della macchia da pulire. Va tenuto presente che si tratta di un prodotto da utilizzarsi per la rimozione di macchie particolari pertanto va applicato solamente sulla macchia. Nel caso di sporco diffuso, si consiglia lavare con Detergenti liquidi.

**IMBALLI E STOCCAGGIO:** Il prodotto se conservato in ambiente asciutto e fresco (20° C) è stabile per sei mesi. Confezioni da gr 450 9 pezzi per cartone Confezioni da kg. 5 3 pezzi per cartone

#### **ULTERIORI INFORMAZIONI:**

Il nostro ufficio tecnico è in grado di fornire, a seguito richiesta, ulteriori informazioni quali schede tecniche relative al preparato.

*Stubborn dirt paste removal is a product specifically formulated to remove stains on marble, granite, cotto and ceramic. It eliminates most of the visible stains such as oil, industrial oil, edible oil, coffee, etc. Please bear in mind that because of the many different stains nature it is not possible to guarantee the product performance. It doesn't damage the stone shining, doesn't leave shades and allows to reinstate the stone original beauty. The paste chemical composition allows to absorb deep stubborn stains.*

**METHOD OF USE:** Apply a layer of 5mm approx on the area to be treated. We suggest to apply it with a spatula. Cover with a plastic film (polyethylene) to create humidity so that the paste remains moist and the dirt absorption will be more efficient. After 2-3 hours remove the plastic film and let the paste dry out naturally. After dry (8-10 hours approx, depending on the room temperature) the paste will appear like dry mud whitish in colour and remove it with a brush.

**REMARKS AND SUGGESTIONS:** Mix well the paste in its container before applying so to mix its components. The paste must stick well to maximise its efficiency. When applying it on oily stains make sure the paste is well applied even when it "slides away". If after the first application the stain is not completely removed repeat the procedure above explained once the dried paste is removed wash with detergent LEM-3 (for marble and limestone) and with extra strong detergent BERT-27 (for granite and cotto). To avoid further staining we recommend to protect the stone with water and oil repellent BLOCK D70.

**COVERAGE:** Much depends on the stain intensity. Bear in mind that the product is used to remove special stains and should be applied on specific areas. In case of wide-spread stains we recommend to use liquid detergents.

**PACKING e STORAGE:** The product if stored in dry and fresh warehouse (20° C) is stable for six months. Packing of gr 450 9 pcs per carton Packing of kg. 5 3 pcs per carton

**MORE INFO:** Our technical department can provide, upon request, further information as technical sheets of the product.

## Technical Bulletin

### “MANGIAMACCHIA” ABSORBING PASTE

Special paste for removing most common spots on natural stones

Revised 01-2006RV/ARB

#### Description:

Mangiamacchia “*spoteater*” is a paste product especially formulated to eliminate spots on natural stones as marbles, granites, calcareous stones, slates, terrazzo, terracotta and ceramics. It cleans the most common spots of oil, industrial grease, food, coffee etc... Its chemical composition allows to absorb deeply resistant spots.

#### Technical Characteristics:

Appearance	paste
Color	grayish
Odor	characteristic
Specific gravity at 20°C	1,1±0,02
Hydro-solubility	soluble at every ratio
pH	8,2±0,2
Biodegradability	100%
Shelf life at 20° C (68° F)	18 months in original packing

#### Instruction for Use:

Apply a layer of 5mm approx on the area to be treated. We suggest to apply it with a spatula. Cover with a plastic film (IE polyethylene) to create humidity so that the paste remain moist and the dirty absorption will be more efficient. After 2-3 hours remove the plastic film and let the paste dry out naturally. After dry (8-10 hours approx, depending on room temperature) the paste will appear like dry mud whitish in color, remove it with a brush. Make a test before use.

#### Suggestion for Use:

- Before use it is suggested to mix well the cream in order to combine the active components using a wooden or plastic stick;
- Paste should adhere well to substrate to improve effect.
- For oily spots be sure that the paste is well applied to avoid that could slip away.
- In case that after fist application the problem is not completely solved, make more applications;
- After application of Mangiamacchia paste we suggest to clean using our **Detergent Lem-3** (marble, terrazzo and calcareous stones) or our **Cleaner Ultra Stripper** (granite, ceramic or terracotta) when Lem3 is not effective.
- Before use, read carefully recommendations printed on the tin.

#### Application on surfaces:

All surfaces types, especially studied for marbles, granites, stone, terrazzo, engineered stone etc...

All data indicated in this leaflet are the results of tests and experiments carried out in our laboratories and through reliable operators in the stone business and have to be considered reliable. Because of the many factors which can influence them, the information here reported do not constitute implicit or formal guarantees. The end user undertakes the responsibility in the usage of the product making sure to experiment the product characteristic as preventive measure.

### “MANGIAMACCHIA” ABSORBING PASTE

Special paste for removing most common spots on natural stones

Revised 01-2006RV/ARB

#### Safety procedures:

As far as the proper working procedures is concerned, we recommend to consult Material Safety Data Sheets issued according to E.U. rules and to follow your national laws concerning safety in the working place.

#### Coverage:

Coverage is subjected to quality and intensity of the stain to remove. It is necessary to consider that Mangiamacchia is a particular products and its use is to solve special problems and should be applied only in small surfaces where there is an evident spot. In case of general soil on floors it is suggested to use liquid cleaners as Detergent Lem- 3, Cleaner Ultra- Stripper or Bert 27.

#### Packing:

Cardboards of: 9 tins of 350 ml (11,85 fl.oz). Bigger packing upon request.

The composition of the tins is glass (VE). After use, comply with the local and national regulations currently in force regarding recycling.

Our packing is conformed as per U.N. rules for inland transport (A.D.R.) and by sea (I.M.O.) for transportation via air refer to updated rules (I.A.T.A.). For further information regarding transport please check MSDS.

#### Harmonized Custom Tariff:

32.14.1900
